1. Evidence & integrity (hashes re-verified at report time)

File	Type	SHA-256	Bytes	Verification	Skew / Offset	Parsing coverage
access.log	auth	ba79e862fb9ac7047006488a26ab0abfdae1011f48ea6dd5f4b60f5d9087dd26	1582	verified	0s / UTC+0m	0% (0/16)
access.log	web	ba79e862fb9ac7047006488a26ab0abfdae1011f48ea6dd5f4b60f5d9087dd26	1582	verified	0s / UTC+0m	93.75% (15/16)

A matching hash shows the stored file is unchanged since collection; it does not by itself prove the file was authentic when collected.
